

GLOBAL SOFTWARE PRODUCT OVERVIEW

THE COMPANY

Globe Computer Systems Limited [GCSL] is an ambitious professional business group in Malawi with diversified infrastructure that caters for all Business Information Technology requirements within Malawi and sub Saharan Africa. GCSL was established over a decade ago primarily focusing on providing IT solutions. Our core competencies are in providing meaningful and cost effective enterprise solutions to the Government, Corporations and all Business Institutions in the areas of system Integration, Client-Server, Networking and Voice/Data Communications, Workflow and Financial Solutions, Corporate Procurement of computer hardware and IT Strategy consulting.

Only **Total Solution** Company in Malawi offering Turnkey Solutions with competencies in all aspects of ITC such as Computer Hardware, Enterprise Solutions, Software Development, Networking and through GCSL's sister company, Globe Internet [GIL] all internet related communication and consultancy services.

Our Commitment to quality of services – We take quality of services seriously and are dedicated not only to maintain the highest standards we have already established but also to constantly upgrade the quality parameters in line with industry developments and innovations.

GCSL benchmarks '**one-stop-solution-provider**' service approach and it aimed at providing total convenience to our clients. Our ability to service multi location businesses lies in the expertise to provide a reliable multi contact points for customers. We consult and provide full range of services mentioned to all our clients and take full responsibility in providing the customer support across the country as we have spread almost all parts of the Country.

OUR PHILOSOPHY

We believe that providing IT solution is an art that is the synthesis of numerous aspects. Rather than deriving our solutions from preconceived or abstract theories, we offer a process that strives for solution that uniquely allows the IT specialist to respond and design to a particular need of each Client.

Sustained growth over the decade, we have been able to build a solid corporate infrastructure with considerable assets and more particularly a solid client base and goodwill.

We have used this insight to constantly develop our services in order to meet ever-demanding requirements of our Clients.

GLOBAL Enterprise Solutions profile

GCSL undertakes software development and implementation of IT solutions backed by state of the art technology with highly skilled professionals.

In the wake of the fast changing technologies World over, system planning, design, implementation and operations have become extremely specialized business. **GLOBALSoft** is a confluence of specialists from IT and Financial Management professions. Having brought together the collective wisdom, experience and expertise for number of years **GLOBALSoft** has developed a wealth of knowledge and understanding of the unique characteristics and intricacies of software development and implementation of total IT solutions.
